Meetings

Meetings are held as needed to allow the committee members to facilitate group discussion of any details needed to assist in the creation and implementation of related events. Meetings are to be held primarily online to best facilitate all person's schedules. Any formal decision making between committee members during meetings should be decided by simple majority agreement. While we normally expect the operational aspects of any meetings to remain in an open and friendly spirit, if formality is required for conducting a discussion to which there is not an overarching consensus, then the committee will operate using the commonly utilized "Robert's Rules of Order (Simplified)" to assist in reaching an expedient and acceptable outcome.
